Create, manage, and run configurations

Android Application

The screenshot shows the 'Configure' dialog for an Android Application named 'EDU_951'. The 'Additional Emulator Command Line Options' field is highlighted, containing the text: `-qemu -m 512 -enable-kvm`. Other visible options include 'Network Speed' set to 'Full' and 'Network Latency' set to 'None'. There are also checkboxes for 'Wipe User Data' and 'Disable Boot Animation', both of which are currently unchecked. The interface includes a left-hand sidebar with a project tree, a top toolbar, and a bottom status bar.
